

Node Locked licentie activeren

Nieuwe licentie activeren/bestaande licentie wijzigen

Wanneer je een nieuwe Node Locked licentie aanschaft, ontvang je een licentie die je tijdelijk kan gebruiken. Om een permanente licentie te kunnen genereren, koppel je jouw systeem aan de licentie. De tijdelijke licentie geeft je tijd om dit te doen. In deze handleiding lees je hoe je jouw systeem aan de licentie koppelt. Wanneer je later het gekoppelde systeem wilt wijzigen, dan doe je dat (met een extra stap) op dezelfde manier. Ook daarvoor kun je dus deze handleiding gebruiken.

Stap 5 • Create machine

In deze schermafbeelding zijn vier unassigned licenses (1) te zien, deze zijn dus nog vrij om te koppelen aan een machine. Onderaan zie je een lijst met machines (2) en daaraan gekoppelde licenties. Ook zie je een machinenaam met een sterretje (3). Dit betekent dat deze machine (nog) geen gekoppelde licenties heeft.
